Hyderabad | India

## OBJECTIVE

Frontend Developer with hands-on experience in JavaScript, React.js, and modern web technologies. Passionate about building responsive, user-friendly applications with a focus on clean design and performance. Currently expanding skills in Node.js, Express.js, and MongoDB to transition into a Full-Stack Developer and contribute to complete end-to-end web application development.

## EXPERIENCE AND PROJECTS

### Web Developer Intern | Innobyte Services

Oct 2024 - Nov 2024

- Redesigned an existing website to improve responsiveness and user experience.
- Utilized HTML, CSS, and JavaScript to implement design improvements and ensure cross-browser compatibility.
- Collaborated with the design team to identify and resolve UI/UX issues, improving website usability.

### Guess The Word

Link: [guess-the-word](#)

- A word guessing game where the user tries to guess the correct word within limited attempts using given hints.
- Built using React, implemented useState for tracking guesses and word logic, and used conditional rendering to update the UI based on user input.

### Tenzies-Game

Link: [tenzies-game](#)

- A dice game where users roll and hold dice until all dice show the same value.
- Developed using React, used useState to manage dice state and game status, with event handling and conditional rendering for gameplay logic.

### Meme Generator

Link: [meme-generator](#)

- Generates custom memes by overlaying text on randomly selected meme images.
- Implemented in React, fetched meme templates via API, handled user inputs for text, and rendered images using state updates.

### Todo List

Link: [todo-list](#)

- A simple task manager where users can add, mark, and delete tasks, with saved state.
- Built with React, utilized useState for task tracking and integrated localStorage to persist data across sessions.

### Chef Claude

- An AI-powered app where users input ingredients and receive a recipe suggestion.
- Built using React, integrated OpenAI API with async fetch, and used form handling and dynamic rendering to display AI-generated content.

## SKILLS

### Programming Languages

Java, Python, JavaScript

### Frontend Technologies

HTML5, CSS3, React.js, TailwindCSS

### Backend technologies

Node.js, Express.js, REST APIs, MongoDB

### Version Control Systems

Git

## EDUCATION

### Sri Indu College of Engineering and Technology

Bachelor of Engineering in Computer Science and Engineering

Dec 2021 - May 2025

CGPA: 7.67
